**Box No. V Reasoned statement under Article 35(2) with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement**

**1. Statement**

	No: Claims	
Inventive step (IS)	Yes: Claims	1-12

**Re Item V**

**Reasoned statement with regard to novelty, inventive step or industrial applicability;  
citations and explanations supporting such statement**

1.0 Reference is made to the following documents:

D1: GB-A-2 152 013 (CRAYONNE LTD) 31 July 1985 (1985-07-31)

2.0 The document D1 is regarded as being the closest prior art to the subject-matter of claim 1, and shows (the references in parentheses applying to this document):

A box, produced by a resistant plastic material, which comprises a base, side walls (10) a top opening (16) provided with a border (12) in its periphery and a cover (30,32,44).

The subject-matter of claim 1 differs from this known plastic box in that the border is provided with an identification means, and that said cover comprises a cut-out which permits the visualization of said identification means.

The subject-matter of claim 1 is therefore new (Article 33(2) PCT).

2.1 The problem to be solved by the present invention may be regarded as providing identification means to the the box such that it can be read by a user without opening the sealed box, and protecting from damage caused by the elements or mechanical damage.

The solution to this problem proposed in claim 1 of the present application is to provide the border of the box with identification means which can be read through a window on the border of the cover, said cover sealing the box in a way that the contents of the box and identification means are protected.

The solution proposed in claim 1 is considered as involving an inventive step (Article 33(3) PCT) because none of the prior state of the art documents consulted disclose the characterising features.
